

Newsletter #01/17:

You're getting this email because at some stage you subscribed on one of our Australian property information websites.

So firstly, Happy New Year and Happy Chinese New Year. Let us hope the Year of the Rooster is less turbulent than last year!

In this issue, I will give you links to some interesting information on our website. Next issue I expect to have the figures available for calendar 2016 from around Australia in relation to capital growth and rental returns over the previous 12 months in all the major cities in Australia.

In this issue:

- 1. BUILDING A PROPERTY PORTFOLIO**
- 2. FREQUENTLY ASKED QUESTIONS**
- 3. CASH IS KING!**

1. BUILDING A PROPERTY PORTFOLIO

If you'd like to build a portfolio of 4 (or more) Australian properties from just one initial deposit and achieve a tax free income of over US dollars 100k per year, my updated new eBook is now available to purchase online at www.buy4properties.com

This is a proven and well tested system to progressively acquire over time a property portfolio of 4 investment properties from one initial deposit, where the rent covers the bank payments, and by adopting a little known and unique strategy to achieve a huge tax free income for life.

My step by step system shows investors how to acquire four properties and then generate over \$100,000 or more in tax free income for life.

2. FREQUENTLY ASKED QUESTIONS

Everything you need to know about investing in Australian property! We have put together a list of some of the most common questions that we have received over the past two years about investing in Australia or in a specific project in Australia. I am pleased to advise that this is now available online so you can download it and have most of your questions answered in one easy document.

Visit: www.citylifeprojects.net/faq.php

3. CASH IS KING!

Everyone "knows" that the safest thing to do is to accumulate cash, especially in uncertain times. We have a very interesting report on our website that shows that regular savings and leaving your money in bank deposits does not really help you increase your wealth.

The report shows that a person who starts with a sum of money but does not regularly save can accumulate substantially more than a person who starts with exactly the same amount and diligently embarks upon a 25 year

savings plan.

I am certain you will be amazed at this report!

You can see it here:
